KINDLY SPONSORED BY

Understanding and supporting our oral cancer patients post diagnosis

Aim:

The aim of the presentation is to raise awareness of the likely impacts of oral cancer on our patients and how we can support them to minimise these impacts and maintain their oral health.

Learning Outcomes

- Understand the different oral cancer diagnoses and their implications for our patients
- Awareness of some common oral conditions that occur during and post oral cancer treatment
- Awareness of the role of dental hygienists in supporting oral cancer patients' long-term

Current concepts in non-surgical periodontal therapy and the role of a Dental Hygienist

Aim:

The presentation aims to highlight the role of a dental hygienist in a modern approach to treat periodontal disease non-surgically in a general dental practice.

Learning Outcomes

- List standard non-surgical treatment protocols followed to treat periodontal disease in General Dental Practice
- Discuss various stages of periodontal therapy
- Appreciate the role of a dental hygienist in various stages of non-surgical periodontal therapy

Important Technical Information

The webinar will be hosted by DTStudyclub, kindly sponsored by Oral-B

To register: Follow the following steps

- Make an account at www.dtstudyclub.com at least one day before June 9th.
- On June 9th, go to www.DTStudyClub.com/EDHF and log in
- You can come in using the password: **EDHF2021** - this is exclusive for members of a dental hygienists association member of EDHF
- Complete a topic-related multiple-choice questionnaire immediately after the webinar.
- Print your certificate straight away.
- You're all set! Have fun with the DT Study Club online training portal!
- Afterwards there is a possibility to watch the recording of the webinar

PLEASE NOTE that you must provide your full address when completing your online profile if you would like to receive continuing education credits.
